

# syost

**music lover. music producer. live hybrid artist.**

Influences from Tulum, Ibiza and New York inspired syost to his current style of Organic & Melodic House music with a touch of Deep House, Orient- and Afro-Tribal sounds.

syost's journey began in his youth by playing guitar in a funk, blues and rock band. His creative flare opened him up to his second love of electronic music.

These two loves ignited an idea within, to mix electronic music with live instruments. This fusion enabled him to combine his creative passion for both styles.

syost attended the music producer Academy in Zurich and since finishing his school, he has been given free rein to explore his musical creativity, in which he mixes his guitar craft from earlier times with his electro tracks...
